

INSTANT TEAM SESSIONS

Persistent, Topic-based Tactical Chat Solution

Your Business Dilemmas

Do you need to build persistent virtual meeting rooms to facilitate real-time group communications?

Do you need to enable groups to communicate and share documents in a real-time environment that is encrypted and secure?

Instant Solution: Instant Team Sessions

Instant Team Sessions delivers encrypted and secure browser-based persistent chat rooms for IBM Lotus Sametime. Instant Team Sessions combines the presence awareness and real-time communication benefits of instant messaging with the persistence of email.

Cross-organizational teams can collaborate on specific topics in the atmosphere of an open forum where both the chat room and the content—conversations, documents, files, bookmarks—persist over time. Access is controlled and password protected, and all conversations are time synchronized.

- ◆ Chat rooms are persistent
 - ◆ Members can come and go at will; the room—and a transcript of all that transpired—will be there when they return
- ◆ Chat rooms are secure, conversations are encrypted
 - ◆ Discuss confidential matters and share sensitive documents safely in real time
 - ◆ Each room can have its own Access Control List
 - ◆ Uses underlying Sametime and Domino security models
- ◆ Runs on Domino
 - ◆ You do not need to license, deploy, and manage Websphere
- ◆ Browser-based architecture
 - ◆ Zero touch = instant deployment

The screenshot shows a web-based application titled "TEAM SESSIONS". At the top, there is a search bar with placeholder text "Search Places...", a "Search" button, and a "Clear" button. To the right of the search bar are buttons for "Page 1", "Page 2", "Page 3", "Previous", "Next", and "+ New Place". Below the header is a table with the following columns: "Chat Place", "Description", "Created By", "Category", and "SubCategory". The table lists ten entries, each with a small icon and a red lock symbol indicating it is a persistent room. The entries are:

Chat Place	Description	Created By	Category	SubCategory
1ID_OPS_G3	First Infantry Division G-3	Lamia Mukanovic	Infantry Force	Unclassified
4/1_SQE_FIRES	Landing 4 Special #OPPS No Classification	Fikri Ghazi	Landing Operations	Classified
SID_OPS_ASSLT-TACC_G4	5th Infantry Tactical Division G-4	Lamia Mukanovic	Infantry Force	Unclassified
8ID_INTEL_OPS_G5	8th Infantry Division G-5	Lamia Mukanovic	Infantry Force	Classified
8ID_OPS_ASSLT_AG2	8th Infantry Assistant Division G-2	Lamia Mukanovic	Infantry Force	Unclassified
ASOC_TALON_B	Air And Space Operations with Officer and Stealth	Fikri Ghazi	Air Space Control	Classified
A_CAO_C_Help_NOMAD_C	Air And Space Operations Class A Classified	Fikri Ghazi	Air Space Control	Classified
C2_ASOC_HORNET_Blast	Agent Field With Class C Operations	Fikri Ghazi	Attack	Unclassified
CAOC_INTEL_DEV	Air And Space Central Development	Spencer Pope	Air Space Control	Unclassified
CAOC_INTEL_DEV_Center_C2_LIN	Air And Space Central Operator in Development	Spencer Pope	Air Space Control	Classified

At the bottom of the table, there is a blue footer bar with the text "Total Chat Places: 23" and "Template: Version: V3B51 Nov 22, 2017 Applet: 1.1.2.3".

INSTANT TEAM SESSIONS

Persistent, Topic-based Real-time Team Collaboration

- ◆ Content is persistent
 - ◆ Store information relevant to the team—discussions, tasks, documents, bookmarks
 - ◆ Team members automatically receive a chat history when they enter the room
- ◆ Automatic contextual alerts
 - ◆ Users can create alerts so they will be notified when a topic relevant to their requirements is being discussed
- ◆ Integrated extension for Websphere Translation Server
 - ◆ Automatically translates all chat conversations from the language of the sender to the language of the recipient
 - ◆ Removes language barriers from real-time communications
 - ◆ Deployment is quick and easy--simply specify the IP address of the Translation Server in the preferences menu of Instant Team Sessions' Sametime Connect client
- ◆ Multiple chat room access options
 - ◆ Browser-based UI, Sametime (including plug-ins for v8.x), and Notes
- ◆ Enhanced chat room list management
 - ◆ Room lists can be categorized, tagged, and searched
- ◆ Advanced server-based alerts with support for immediate broadcasts to room members via IM or email
- ◆ Full integration with portals and enterprise service bus

"We have project teams comprised of employees scattered all over the globe. Instant Team Sessions enables them to stay current with discussions that happen both during and after their respective work days."

"Instant Team Sessions turned a convenient conversation medium into an iron-clad secure group collaboration environment."
